CAREER OBJECTIVE

Dedicated **Frontend Developer** with hands-on experience in **React.js, Next.js, JavaScript, and modern UI frameworks like Tailwind CSS and DaisyUI**. Skilled in building responsive, user-friendly web interfaces with clean component architecture and optimized performance. I aim to contribute to a collaborative development team where I can strengthen my frontend expertise and deliver intuitive, high-quality user experiences.

SKILLS

I have practical expertise in frontend development using **React.js, Next.js, JavaScript (ES6+), Tailwind CSS, DaisyUI, and responsive UI design**. I specialize in building reusable components, managing client-side data, optimizing performance, and integrating REST APIs. I also have experience with **Firebase authentication, JWT-based protected routes**, and basic backend communication with Node.js/Express APIs. Additionally, I am familiar with **Git, GitHub, VS Code, Postman, and deployment using Vercel and Firebase**.

PROJECTS

FastFeast – Online Food Delivery Management System

[Live Link](#) | [GitHub Link](#)

Team Project (7 Members) | Role: Frontend Developer & Content Manager

Developed and managed frontend features for a full-stack food delivery platform with real-time order tracking and AI-based recommendations.

Key Features:

- Implemented **Blog System** (listings, categories, details, and admin CRUD) with MongoDB integration.
- Built **responsive homepage components** — newsletter and customer review sections with animations.
- Designed and developed the **Career Page** with responsive layout and data integration.
- Ensured secure operations with **NextAuth authentication** and optimized UX using **Tailwind CSS**.

Tech Stack: Next.js (App Router), React.js (Hooks), MongoDB, Mongoose, Tailwind CSS, NextAuth.js, Vercel

FIRST – Life Insurance App

[Live Link](#) | [Github Link](#)

Objective: A secure, responsive, and modern MERN Stack-based life insurance web application that enables users to explore policies, get personalized quotes, apply for policies, manage their dashboard, and make payments online — all while maintaining proper user role access and control.

Key Features:

- **Role-based dashboards** (Admin, Agent, and Customer), secure JWT + Firebase auth, dynamic quote estimation, Stripe payment integration, and policy PDF download.
- Includes blog management system, newsletter subscription, search & filter policies with pagination, and responsive UI using Tailwind CSS + Flowbite/Mamba UI.

Tech Stack: React, JavaScript, MongoDB, Nodejs, Tailwindcss, Express, Axios, React Query

Zahaba Tours – Tour Booking Platform

[Live Link](#) | [GitHub Link](#)

Objective: MERN stack travel booking app with Firebase authentication (Email/Password + Google) and JWT-secured APIs. Implemented **user & guide dashboards** for package booking, management, and status tracking. Built with React, Tailwind CSS, DaisyUI, Framer Motion, Node.js, Express.js, Mongo DB, Firebase

Key Features:

- **Public:** Animated home banners, tour offers, explore all packages, view package & guide details, responsive UI.
- **Authentication:** Firebase auth with Email/Password & Google, protected routes for dashboard
- **User Dashboard:** Book tours, view/manage bookings, cancel/update, track booking status..
- **Guide Dashboard:** Add/manage tour packages, update/delete, track bookings, view profile.

Tech Stack: React, JavaScript, MongoDB, Nodejs, Tailwindcss, Express, Firebase

EDUCATION

Bachelor of Arts (Honors) in Fine Arts,

University of Chittagong (2nd year Completed)

COURSE

- Complete Web Development Course
- Roudromoyee Online Graphic Design Short Course
